2The Netherlands Institute for Curriculum Development (SLO)
3Educational Development & Research, Maastricht University
Learner control

- No SA skills
- No TS skills

Self-assessment and task selection skills

Learner control

- Unsuitable learning pathway

Development domain-specific skills
Advisory model

• Three advisory models: Procedural, strategic, feedback advisory model

• First experiment: Procedural advisory model
  Advice on self-assessment = Providing scoring rubrique with task relevant performance standards
  Advice on task selection = important task aspects and straightforward advice
Research question

Explorative study:

What are the effects of the Procedural Advice on self-assessment and task selection skills and domain-specific skills?
